

Announcement: Newark, NJ Again a Leader in Clean Fuels

“A decade after becoming the first energy supplier to commercialize Ultra Low Sulfur Diesel Fuel, Sprague Energy Introduces Another Milestone Event to Supply First Nationally Available Advanced Biofuel at the Sunoco Logistics Newark Terminal”

Please join us for the official opening of the newest and most expansive multiproduct biodiesel/Bioheat™ loading terminal in New Jersey on June 20, 2011. The facility affords commercial users and residential heating fuel consumers potential lower energy costs, cleaner air, reduced dependence on foreign oil, and a pathway for entities to reduce their carbon footprint, while providing fuel suppliers a means to meet U.S. EPA RFS#2 regulations.

Biodiesel and Bioheat™ are renewable and sustainable fuels and the only nationally available advanced biofuel as recognized by the U.S. EPA. The availability of the biofuel will overcome infrastructure hurdles to provide a convenient centralized fueling location with seamless product loading.

When: Monday June 20, 2011
1:30 PM

Where: Sunoco Logistics Newark Terminal
436 Doremus Avenue
Newark, NJ 07105
Directions below.

RSVP: As the terminal's security is regulated by the Department of Homeland Security and the Coast Guard, your RSVP to the event is required. Please respond to Margaret Bedenbaugh, (252) 288-5410 or mbedenbaugh@spragueenergy.com.

Directions North and South:

Travel I-95/New Jersey Turnpike to Exit 15 toward Newark/Jersey City. Take the US-1-Truck/US-9-Truck/Doremus Ave exit toward Bayonne/Jersey City. Take the Doremus Ave. ramp and turn right onto Doremus Ave.
