

Segment: **Atlantic County, NJ**

Episode #: **3035**

Airing date: **May 7, 2011**

Channel: **PBS and Discovery**

This week's Clean Cities Success Story features New Jersey's Atlantic County Utilities Authority (ACUA), which employs biodiesel, compressed natural gas, renewable natural gas, solar energy, and wind to meet its transportation and power needs. Not only has ACUA achieved significant reductions in greenhouse gas emissions, but it has also saved more than \$2 million per year in operating costs.

Produced by Maryland Public Television's MotorWeek program, this short segment will air on PBS stations nationwide starting **May 7, 2011** (in the regular weekly MotorWeek timeslot on your local PBS station). MotorWeek is also available on [Discovery HD Theater](#).

For show times in your area, check the [MotorWeek](#) and [Discovery](#) Channel Web sites. While many local PBS affiliates are still broadcasting in standard definition, viewers with newer widescreen televisions can watch the episode in 16:9 hi-definition on Discovery HD Theater.

Previous segments in the series are now available on the [Alternative Fuels and Advanced Vehicles Data Center \(AFDC\)](#) Web site. New segments will be posted as they air.
