

NJCCC General Meeting

The New Jersey Clean Cities Coalition
General Meeting
Wednesday, January 27 from 8:30 to 10:30
Hosted by New Jersey Natural Gas
1415 Wyckoff Road, Wall, NJ

A detailed agenda will follow. Topics will include updates on grants and other funding programs, presentations on alternative vehicle technologies, new committee opportunities, and plenty of networking opportunities.

Featured Speaker will be Joanna Underwood
President of Energy Vision

This event will be free to all participants.
A limited number of tabletop exhibits and other sponsorship opportunities remain available.

Please RSVP to Chuck Feinberg at chuck.feinberg@gmail.com. Please also feel free to pass this announcement on to others who may have an interest.

Guest Speaker - Joanna Underwood

Joanna Underwood has been a leading figure in the US environmental movement since the early 1970s. From 1970 to 1973, Ms. Underwood was co-director of the Council on Economic Priorities, the first organization in the US to evaluate the environmental practices of businesses for investors. Ms. Underwood founded INFORM in 1974 for expanded analysis of environmental business practices aimed primarily at identifying solutions. Under her guidance, INFORM became a prime force in educating decision-

makers in the public and private sectors about the need for preventive approaches to some of this country's most complex environmental problems.

INFORM's numerous reports in the field of sustainable transportation, exploring the fuels and advanced vehicles of the future, first highlighted the potential role of natural gas as a vehicle fuel in its 1989 report, Drive for Clean Air. In 1995, it published Harnessing Hydrogen, the first clear public analysis of hydrogen fuel cell technology as perhaps the ultimate form of sustainable transportation. These reports have been used by policymakers and industry leaders worldwide.

Ms. Underwood stepped aside as President of INFORM in 2006 to found a new organization, Energy Vision, focused entirely on the challenge of sustainable transportation. Energy Vision is a national non-profit organization analyzing and promoting ways to make a swift transition to pollution-free renewable energy sources and to clean, petroleum-free transportation fuels.

Ms Underwood has written and lectured widely on energy and environmental issues. She has served on many Boards and Government Advisory Bodies, including: Advisory Committees of the US Department of Energy on renewable sources and Task Forces of the Congressional Office of Technology Assessment, and a Board member of the New York State Energy Research and Development Authority. She currently serves on the Board of Directors of the Clean Vehicle Education Foundation.

A graduate of Bryn Mawr College, Ms. Underwood has taught at New York and Adelphi Universities. She received an honorary doctor of science degree from Wheaton College. She has twice been chosen by Earth Times as one of the world's 100 most influential environmental leaders.

NJ CLEAN CITIES COALITION is a 501(c)3 nonprofit dedicated to the advancement of alternative fuels and advanced vehicle technologies in order to increase domestic energy security, enhance economic development and improve regional air quality. We rely on membership fees and sponsorships to carry out our activities.
Please help support our activities!
