

Does your NJ fleet include any hybrids? Do you use any alternative fuels such as biodiesel or compressed natural gas? Do you have any idle-reduction policies in effect?

If so, then I need your help!

As you may know, one of the tasks that the U.S. Department of Energy (DOE) requires of Clean Cities Coordinators is to compile and submit an annual report of the activities and accomplishments of their coalition stakeholders. These petroleum-reduction activities need to be reported whether they were funded by DOE or not. Information gleaned from these reports allows the DOE (and Congress) to track progress of the national program and are used to support funding levels for our efforts. Data and information are submitted by the Coordinators to an online database that is maintained as part of the Alternative Fuels and Advanced Vehicles Data Center (AFDC) at the National Renewable Energy Laboratory (NREL). The reports include a range of data about use of alternative fuels, deployment of alternative fuel vehicles and fueling stations, hybrid electric vehicles, idle reduction initiatives, fuel economy activities, and programs to reduce vehicle miles driven.

The activities of our NJCCC stakeholders in 2010 resulted in the displacement of almost 2,000,000 gallons of petroleum! I am sure that our collective efforts in 2011 will result in our

doubling of that figure.

So, its that time of year when I will soon be reaching out to you to assist in this effort for the 2011 reporting year. Your cooperation on this will be greatly appreciated. I fully understand that you are busy and that this will not necessarily be a priority for you, but, again, I greatly appreciate your efforts.

I will follow-up with you, or others in your organization, with specific requests in the near future. Thanks in advance!

Chuck Feinberg, NJ Clean Cities Coordinator

NJ CLEAN CITIES COALITION is a 501(c)3 nonprofit dedicated to the advancement of alternative fuels and advanced vehicle technologies in order to increase domestic energy security, enhance economic development and improve regional air quality. We rely on membership fees and sponsorships to carry out our activities. While membership in the NJCCC is not required to be on our mailing list, it is certainly appreciated!

Please help support our activities!
